

REFLECTION ASSIGNMENT
"Civil Liberties and the War on Terror"

You just watched a film of a debate on whether the government's actions in pursuing the war on terror was damaging one of our five core political "values" in this country—that of liberty.

Your assignment is to think of another current issue or event (within the last five years) that could be seen as either conflicting with, or strengthening, one of our five core elements of our political culture. Write your choice, and the rationale for that choice, in the space below. Use the back of this sheet, if necessary.
